

ATCE 2010 »

For the first time, SPE's flagship meeting—the **Annual Technical Conference and Exhibition**—will be held outside the United States. Join us in Florence, Italy, to share technical knowledge, network with colleagues from around the world, and celebrate key successes in the E&P industry.

WHY ATTEND ATCE 2010?

For the past 85 years, ATCE has been the leading technical conference in the E&P world, bringing together emerging technologies; state-of-the-art innovations; leading-edge companies and organizations; and thousands of engineers, scientists, managers, and executives each year. With more than 50% of SPE membership residing outside of the United States, SPE recognizes how important it is for its annual meeting to be accessible to all members around the world. ATCE is one of the best tools that SPE has to assist members and nonmembers with professional and technical proficiencies.

The technical program covers all areas of interest including:

- Drilling and Completions
- Projects, Facilities, and Construction
- Health, Safety, and Environment
- Management and Information
- Production and Operations
- Reservoir Description and Dynamics

ATCE also includes special programs designed for students and young professionals to help navigate their careers and gain technical knowledge.

PLANNING AHEAD

If you'd like to attend ATCE 2010, we strongly suggest that you start planning now. New visitors to Florence are encouraged to learn in advance as much as they can about the city and its amenities.

CONNECT WITH SPE

SPE provides multiple ways for you to keep up with important ATCE news:

- Follow us on [Twitter.com/SPE_ATCE](https://twitter.com/SPE_ATCE)
- Sign-up for email updates at www.spe.org/atce
- Sign-up on [Facebook.com/spemembers](https://facebook.com/spemembers) for updates on ATCE and other SPE products and services
